

ALBUM IN A YEAR: December online material

Do You Know What I Know? by Amanda Probst. **Supplies** Cardstock: Prism Papers; *Patterned notebook paper:* Making Memories; *Photo card:* Shutterfly.com; *Envelope:* Bazzill Basics; *Stamps:* Cornish Heritage Farms (dot pattern); Hero Arts (month); *Ink:* Colorbox (yellow); Close To My Heart (brown); *Computer fonts:* Impact, Microsoft Word; Pegsanna, downloaded from ScrapVillage.com; Adobe Wood Type Ornaments, unknown.

Step by step instructions to recreate this layout:

1. Cut two pieces of cardstock (or patterned paper) to 8.5" x 10.25".
2. Print the title block on cardstock and trim to 8" x 3.5". Adhere to one of the pieces of cardstock cut in step one.
3. Find an envelope larger than your photo card. (I liked that this one had a side opening, so that I can more easily access my holiday letter which is tucked inside. Alternately, you could adhere the photo card to the top flap of an envelope and lift the photo card to access the holiday letter.) Adhere the envelope to the top of the other piece of cardstock cut in step one. Adhere your photo card on top of that. (Feel free, too, to add the little "holiday letter inside" label which I've included with the title block download.) Tuck your holiday letter inside.
4. Trim your photos to fit the remaining areas of the two pieces of cardstock. On the left page, my photos here are roughly 2.5" x 2.5" and 4" x 2.75". On the right page, my photos are roughly 2.5" x 2" and 4" x 4". Adhere photos. Feel free to substitute patterned paper, pieces of holiday cards received, or other holiday memorabilia in place of photos.
5. Stamp dot background and the word "December" on a piece of patterned paper. (I used one of the pages in Making Memories' spiral notebooks.) Adhere to right page so that the bottom edge is 2.25" from the bottom of the page and the right edge is about 1" from the right edge of the page.
6. Adhere the two pieces of cardstock cut in step one onto the pages. Center them vertically and place them roughly 1" from the center of the layout.
